20

CLAIMS

- 1. Cosmetic and or dermatological composition intended for treating keratin fibres, in particular human keratin fibres and more particularly human hair, comprising, in a support which is suitable for keratin fibres:
- (a) at least one enzyme of 2-electron oxidoreductase 10 type in the presence of at enzyme,
 - (b) at least one basic amino acid.
 - 2. Composition according to Claim 1, characterized in that the 2-electron oxidor ductase is chosen from
- uricases of animal, microbiological or biotechnological origin.
 - Composition according to Claim 1 or 2, characterized in that the 2-electron oxidoreductase(s) represent(s) from 0.01 to 20% by weight relative to the total weight.
 - 4. Composition according to Claim 3, characterized in that the 2-electron oxidoreductase(s) represent(s) from 0.1 to 5% by weight relative to the total weight of the composition.
- 25 5. Composition according to Claim 2, characterized in that the donor (or substrate) for the said 2-electron oxidoreductase is chosen from uric acid and its salts.
- preceding claims, characterized in that the donor(s) represent(s) from 0.01 to 20% by weight relative to the total weight of the composition.
- Composition according to Claim 6, characterized in that the donor(s) represent(s) from 0.1 to 5% by seight relative to the total weight of the composition.
 - Composition according to any one of Claims 1 to characterized in that the basic amino acids are preferably chosen from those corresponding to formula (I) below:

• • • •

R-CH₂ 1CH CO₂H (I)

in which R denotes a group chosen from:

N HIN

-(CH₂)₃NH₂

(CH₂)₂NH₂

-(CH₂)₂NHCONH,

-(CH₂)₂NH — C — NH₂

9. Composition according to any one of Claims 1 to 8, characterized in that the concentration of basic amino acid ranges from 0.01% to 20% by weight relative to the total weight of the composition, and preferably 10. Ready-to-use composition

10. Ready-to-use composition according to any one of Claims 1 to 9, for the oxidation dyeing of keratin fibres, and in particular man keratin fibres such as the hair, of the type also comprising, in a medium which is suitable for keratin fibres, at least one oxidation base and, optionally, one or more couplers.

15 11 Composition according to Claim 10, characterized in that the exidation bases are chosen from para-phenylenediamines, double bases, ortho- or para-aminophenols and heterocyclic bases, as well as the addition salts of these compounds with an acid.

20 12. Composition according to Claim 10 or 11, characterized in that the oxidation bases are present relative to the total weight of the composition.

Composition according to Claim 10 or 11, in concentrations ranging from 0.0005 to 12% by weight relative to the total weight of the composition.

25 characterized in that the couplers are chosen from meta-phenylenediamines, meta-aminophenols, meta-

·

diphenols and heterocyclic couplers, and the addition salts of these compounds with an acid.

- 14. Composition according to Claim 10 or 13, characterized in that the couplers are present in concentrations ranging from 0.0001 to 10% by weight relative to the total weight of the composition.
- 15. Composition according to Claim 11 or 13, characterized in that the addition salts with an acid for the oxidation bases and the couplers are chosen
- from the hydrochlorides hydrobromides, sulphates, tartrates, lactates and acetates.

 16. Composition according to any one of the content of the couplers are chosen by the chosen by the couplers are chosen by the chosen by

16. Composition according to any one of Claims 10 to 15, characterized in that it also contains direct dyes.

- 15 17. Composition according to any one of Claims 1 to 16, characterized in that the medium which is suitable for the keratin fibres (or support) consists of water or of a mixture of water and at least one organic solvent.
- 20 18. Composition according to Claim 17, characterized in that the organic solvents can be present in proportions preferably ranging from 1 to 40% by weight relative to the total weight of the composition, and even more preferably ranging from 5 to 30% by weight.
- 25 19. Composition according to any one of Claims 1 to and preferably from 6.5 to 10.
- 20. Composition according to any one of Claims 1 to 19, characterized in that it also contains at least one cosmetic adjuvant used conventionally in compositions for dyeing, permanently reshaping or bleaching the hair, chosen from the group consisting of anionic, cationic, nonionic, amphoteric or zwitterionic surfactants or mixtures thereof, anionic, cationic,
- 35 nonionic, amphoteric zwitterioni or polymers mixtures thereof, inorganic or organ\ic thickeners, antioxidants, enzymes other than the oxidoreductases, 2-electron penetration agents, sequestering agents, fragrances, buffers, dispersing agents,

· · ·

5

conditioners, film forming agents, preserving agents and opacifiers.

- 21. Process for dyeing keratin fibres, and in particular human keratin fibres such as the hair, characterized in that at least one ready-to-use dye composition as defined in any one of Claims 10 to 20 is applied to the said fibres, for a period which is sufficient to develop the desired coloration.
- 22. Process according to Claim 21, characterized in that it includes a first step which consists in separately storing, on the one hand, a composition (A) comprising, in a medium which is suitable for dyeing, at least one oxidation base and optionally at least one coupler as defined in any one of Claims 10 to 16, and,
- on the other hand, a composition (B) containing, in a medium which is suitable for keratin fibres, at least one enzyme of 2-electron oxidoreductase type in the presence of at least one donor for the said enzyme as defined in any one of the preceding claims, and then in
- 20 mixing them together | at | the fime of use, before applying this mixtu**/**e to the keratin fibres; composition (A) or composition (B) containing the basic amino acid as defined in the preceding claims. 23. Multi-compartment dyeing
- characterized in that it contains a first compartment containing composition (A) as defined in Claim 22 and a second compartment containing composition (B) as defined in Claim 22.
- √Process treating\ keratin for fibres, in 30 particular the hair, in order to obtain a permanent reshaping of this hair, in particular in the form of permanent-waved hair, this prodess comprising following steps: (i) a reducing composition is applied the keratin fibres to be treated, the substance being placed under mechanidal tension before, 35 during or after the said application, $\langle (ii) \rangle$ the keratin substance is optionally rinsed, (ii\) an oxidizing composition as defined in any one of Claims 1 to 9 and

17 to 20 is applied to the optionally rinsed keratin

substance, the keratin substance is optionally (iv) rinsed again.

25. Process for treating keratin particular the hair in order to bleach them, this in process comprising the application of an oxidizing composition as defined in any one of claims 1 to 9 and 17 to 20 optionally containing an auxiliary oxidizing agent and a second step of rinsing the keratin fibres.
